

Personal Profile

Christi Mitchell

IP Director at Medius, Healthcare Chairman and President for Licensing Executive Society (LES) Great Britain and Ireland and immediate past LESI (International) Healthcare Chairman. Christi's International licensing and commercialisation experiences with both academic and corporate bodies conveys unique experience to the licensing and business development process within the Healthcare and Biotech sectors.

Christi provides expertise in the acquisition of intellectual Property Rights and in the licensing out of technologies, as well as the valuation of inventions and the potential IPR that may arise from the invention, advice and financial guidance to start-up companies. This guidance extends to National Healthcare Trusts, Universities and Companies.

Christi has worked with a wide variety of healthcare companies in different roles; acquiring technology to fit a specific commercial need, building patent portfolios, starting up companies, raising finance and licensing Intellectual Property Rights throughout the world. The majority of her experience was gained as a Senior Licensing Executive at BTG plc, where initially she assessed technology for its ability to be transferred to start up companies. She then moved on to transfer Healthcare technologies globally on behalf of small and medium size companies and Universities across Europe and the USA.

Christi's IP and technology transfer experience also extends to India, Japan, Singapore and South Korea. Her academic background includes Human Genetics, Molecular Biology and Business Management.
